

- Willis Tower, standing 110 stories, is the tallest building in North America and the eighth tallest in the world at 1,450 feet – 1,730 feet at the top of the twin antenna.

- On a clear day, four states – Illinois, Indiana, Michigan and Wisconsin – can be seen from the Skydeck.

- The tower took three years to build and was completed in 1973.

- The building averages a six inch sway from the true center on windy days.

- Willis Tower has a total of 16,100 windows.

- The building operates some of the fastest elevators in the world, traveling at 1,600 feet per minute.

SKYDECK LEDGE

- The Ledge extends over four feet outside of the 103rd floor – 1,353 feet over Wacker Drive and the Chicago River!

- The Ledge was designed by the building's original architects – Skidmore Owings and Merrill.

- Each box is comprised of three layers of half-inch thick glass laminated into one seamless unit.
